Summary

I'm a multidisciplinary professional with a passion for crafting digital experiences that are not only visually appealing but also seamlessly functional. I wear multiple hats, being a UX/UI designer, front-end developer, and backend developer, allowing me to shape every aspect of a digital project from conception to execution. With a strong foundation in user experience and user interface design, I create intuitive and user-centered designs that prioritize the needs and goals of the end-users. I believe that great design is not just about aesthetics, but also about creating meaningful interactions that enhance user satisfaction and engagement.

Experience

UI Designer
Aetsm Soft
Apr 2023 - May 2023 (2 months)
