Ayesha Afzal

MERN, Next.js, React Native Dev | Python, FastAPI | I Build AI Apps
That Feel Effortless to Use
Karāchi, Sindh, Pakistan

Summary

I'm a passionate Full-Stack & Mobile App Developer with 2+ years of hands-on experience in MERN, Next.js, and React Native, and 3 years as a UI/UX Designer using Figma. My focus? Building scalable, AI-powered, and user-friendly applications that solve real problems and feel great to use.

From eCommerce platforms and travel apps to inventory systems and Islamic learning tools, I've built and deployed 8+ full-featured apps across web and mobile. I thrive in environments where clean code, intuitive interfaces, and smart automation come together.

While I specialize in modern stacks like Python (FastAPI), React, and Next.js, I'm also fluent in Laravel, PHP, Vue.js, and even Flutter — giving me the flexibility to adapt to different teams and project needs.

Always curious. Always building.

Let's connect — I'm open to collaborations, freelance work, and exciting full-time opportunities.

Experience

asani.io
Full Stack Developer
July 2025 - Present (4 months)
Karāchi, Sindh, Pakistan

Role & Responsibilities:

- Assisting in building scalable and modular web applications using React, Node.js, and Express.js
- Integrating real-time data monitoring tools like Prometheus and Grafana into dashboards
- Writing clean, reusable code using controller-service architecture for Express backend

- Learning to work with WebSockets, MQTT, and Pub/Sub systems for IoT-based features
- Actively contributing to frontend components using React + Tailwind CSS
- Collaborating with senior developers on code structure, API integrations, and observability
